Excerpt: . the third term and having double the frequency of the fundamental is present, as was to be expected from the parabolic shape of the characteristic. It is shown by the curve ff in Fig. 83. This is the undesirable term which causes distortion. The last term, which is proportional to the square of the input voltage is the change in the d-c. component due to the alternating input voltage (shown by the broken line in Fig. 83), and is the only effective component of the output current when using the device as a radio detector. If the output transformer T_o (Fig. 82) has a sharp frequency characteristic, and a pure note be impressed on the input of the tube, a current meter A_2 inserted in the load circuit would indicate a current which is proportional only to the second term of equation (19),...
