

The Analysis and Solution of Cubic and Biquadratic Equations; Forming a Sequa to the Elements of Algebra, and an Introduction to the Theory and Solution of Equations of the Higher Orders

By John Radford Young

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1842 Excerpt: .Therefore the remaining root lies between--20 and--30. The place of this, therefore, is accurately determined; that is, its first figure is ascertained: it is--2, in the ten s place. But the situation of the other root, that between 0 and--10, is not yet discovered with sufficient precision, as we cannot at present pronounce upon its first figure. We must therefore be more minute in. our analysis of the proposed equation within the limits of $a = 0$ and $x = -10$: that is, we must subdivide this interval as follows: $x = 0$.-----+ one variation--2, . +----+ two variations. Hence the root sought lies between--1 and--2. Its first figure is therefore--1 in the unit s place. It ought to be remarked, however, that when, as in the present case, only a single root lies in the interval to be examined, the substitutions need not be made in...
