Thoroughness and timeliness of application, especially good coverage of the tops of the trees, are important in securing good control of diseases and insects. 3. Efficiency of man labor and machine operations are important in spraying, but often the most essential thing is to cover the orchard within a definite time even though the cost may be increased. 4. An adequate supply of water, easily and quickly available, is an important factor in efficient spraying. 5. The cost of spraying is a small part of the total cost of apple production, and good fruit is so essential to success that the five standard sprays should be applied normally. If the equipment and labor are available, the out-of-pocket cost of an additional (marginal) spray is very small. 6. The medium-sized spray outfit seems most efficient for small orchards or those with rough topography. About the Publisher Forgotten Books publishes hundreds of thousands of...
